Port Forwarding on non-default gateway Port Forwarding on non-default gateway. This topic has been deleted. Only users with topic management privileges can see it. E. Eirik last edited by . Hi. My hosts are on LAN, traffic out through WAN. I also have OPT1 where one server is placed. This server uses an interface connected to an openvpn client.

Port Forwarding on non-default gateway | Netgate Forum

The default gateway can be specified by the route command to configure the node's routing table and default route. In a home or small office environment, the default gateway is a device, such as a DSL router or cable router, that connects the local network to the Internet. It serves as the default gateway for all network devices.
