Cohen's classification of tourist is based on the theory that tourism combines the curiosity to seek out new experiences with the need for the security of familiar reminders of home. Most tourists prefer to explore the destinations from a familiar base.

Theories on Tourism - Term Paper

Queueing theory is the mathematical study of queuing, or waiting in lines. Queues contain customers (or "items") such as people, objects, or information. Queues form when there are limited resources for providing a service. For example, if there are 5 cash registers in a grocery store, queues will form if more than 5 customers wish to pay for their items at the same time.
