Learn CS666 (what I call the politics of software development) and you can usually forget about it. Refuse to learn it, and it'll be with you forever. As we get older, we tend to see the value in transferable and general skills: functional programming rather than Spring/Hibernate; algorithms rather than quirks of a Java 1.4 legacy system.

I'm searching for an serial communication API for Java. Very important is the support of 64 bit systems. I've used rxtx with the 64 bit libs of Cloudhopper but on some Windows Server 2008 systems I got heavy problems with jvm crashes when accessing (virtual) serial ports.. The main purpose is interacting with analogue modems, maybe there is another way of modem communication in Java?
