### **Official HP® Support**

The software installed on an AX4-5i or AX4-5SCi storage system determines the number of iSCSI servers that you can connect to the storage system. The maximum number of connections between servers and a storage system is limited by the number of initiator records supported per storage-system SP. An initiator is a NIC or iSCSI HBA port in a that can access a storage system. Note that some NICs or iSCSI HBAs may have multiple ports.
