have an endless supply of quality Exponents and ...

Exponents and Radicals Worksheets | Exponents & Radicals ...

Negative exponents translate to fractions. For example, $4^{-3} = 1/(4^3) = 1/64$. The more negative the exponent, the smaller the value. This is especially important in the sciences when talking about orders of magnitude (how big or small things are). In fact, the positive and negative powers of 10 are essential in scientific notation.
