with us. That's why we've again crawled deep into the Internet to compile this list of 20 places to download free e-books for your use.

Refracted Visions

As shown in Figure 1, light passes through the cornea and pupil, is bent or refracted (see How Light Works) by the lens, and comes to a point or focus on the retina, where the image is formed. In the retina, sensory cells called rods and cones change the photons of light into electrical signals, which are then transmitted to and interpreted by the brain.
