Robotic Parking Systems Inc. has built the largest and fastest automated parking garages in the world. As the original US manufacturer, we designed extreme reliability and redundancy into every aspect of the automatic parking. A Robotic Parking System is more economical, greener and safer than any other urban method of parking. Mission Statement

Our Mechanized Car Parking Systems Are Designed To Exceed Expectations. Westfalia's robotic parking garage is designed with high structural standards and environmental protection in mind. Westfalia designs all of its systems in a redundant and virtually fail-safe manner. Westfalia's automated parking system design and engineering teams take your available parking area dimensions and design a compact, efficient mechanized parking system to fit your unique needs.
