Wheel-Size.com :: Reference guide for car wheel and tyre ...

Each metric tyre measurement shows both the metric tyre size and the inch equivalent. To calculate a metric tyre size into inches you multiply the first number by the second number divided by 100 which gives you the sidewall height in millimeters, divide it by 25.4 to convert it to inches.

Tyre Size Chart

Regular road cars generally have wheels that are between 14 and 19inches in diameter, with newer, more sporty, and luxury cars generally having the larger sizes. Where you see the wheel size written down such as 7x17in the larger of the two measurements will virtually always be diameter, with the smaller number relating to the width.

A beginner's guide to wheel sizes | Haynes Publishing

Plus+ size tyres fill the gap between traditional size MTB tyres and the wider fat bike sizes. For example: A 650b+ diameter tyre, fitted to 650b/ISO584mm diameter rims give the rider a wheel where the approximate outside diameter of the 650b+ tyre is the same as that of a 29in/ISO622mm wheel and standard 2.25in/ISO57mm tyre.
